
Global LEI System Business Report

Q3 2020

LEI issuance and LEI growth potential: State of play

At the end of the third quarter of 2020, the total LEI population was over 1.65 million. More than 48,000 LEIs were issued during this quarter, compared to approximately 61,000 in the previous quarter. This represents a quarterly growth rate of 3.3% (previous quarter: 4%). The drop of new issuance was primarily driven by the summer holiday season in EU jurisdictions.

In the third quarter, China had the highest quarterly LEI growth rate at jurisdiction level (17.8%), followed by India (9.3%), Japan (6.8%), Estonia (6.6%) and Lithuania (6.5%). China continued to lead the growth for five consecutive quarters, primarily driven by regulatory implementations.

Competition in the Global LEI System

The report identifies the least and most competitive markets of those with more than 1,000 LEIs, based on the number of LEI issuers providing services in the jurisdiction. In the third quarter of 2020, China, the Netherlands, the Czech Republic, Spain and Italy were the five least competitive markets in descending order. The five most competitive, also in descending order, were Lithuania, Romania, Portugal, Latvia and Malta.

LEI renewal rates

The annual renewal process ensures that the legal entity and the LEI issuing organization review and re-validate the legal entity reference data at least once per year. The Global LEI System is unique in providing absolute transparency on the timeframe when data was last verified.

In the third quarter of 2020, the overall renewal rate¹ of 67.6% was higher than the previous quarter (64.2%). At the end of the quarter, 67.7% of all LEIs were in good standing (last quarter: 68%).

The renewal rate in the EU increased to 69.2% (previous quarter 66.2%). In non-EU jurisdictions, it also improved to 59.8% (previous quarter: 55.9%). In the reporting period, China (84.6%) entered the ranking of the five jurisdictions which demonstrated the highest renewal rates. Other jurisdictions in the top five are Liechtenstein (96.3%), Japan (94.5%) Finland (92.7%) and Germany (83.9%).

The five jurisdictions with the highest non-renewal rates include Brazil (56.8%), the United Kingdom (54.9%), Thailand (54.2%), the United States (53.9%) and South Africa (51.9%).

While the COVID-19 pandemic appeared to impact renewal activities in the first and second quarter of 2020, the renewal rate recovered to its pre-pandemic level in the third quarter.

Level 1 reference data corroboration

The business card information available with the LEI reference data, for example, the official name of a legal entity and its registered address, is referred to as 'Level 1' data. It defines 'who is who'. The Level 1 data is considered fully corroborated if, based on the validation procedures in use by the LEI issuer, there is sufficient information contained in authoritative public sources to corroborate the information provided by the legal entity for the record. If this is not the case, or the legal entity is not required to file with a local register² (e.g. fund or trust), the business card information available with an LEI record is classified as 'entity-supplied only'.

In the third quarter of 2020, the percentage of fully corroborated Level 1 reference data within the entire LEI population increased slightly to 81.6% from 81.4% in the previous quarter.

Statistics on the reporting of parent information by legal entities

In the third quarter of 2020, approximately 1.51 million LEI registrants (previous quarter: 1.46 million), representing 91% of the total LEI population, had reported information on direct and ultimate parents. 99.9% of those LEI registrants who obtained a newly issued LEI, or renewed an existing LEI, in this quarter reported parent information.

In the reporting period, the percentage of legal entities reporting a direct parent that has an LEI was 6%. 5% of legal entities reported a direct parent that does not have an LEI. 81% of legal entities reported no direct parent according to the definition used. 8% of legal entities cited legal obstacles preventing them from providing or publishing direct parent information. The share of all four categories has remained stable over the past four quarters. The pattern is almost identical for ultimate parent reporting.

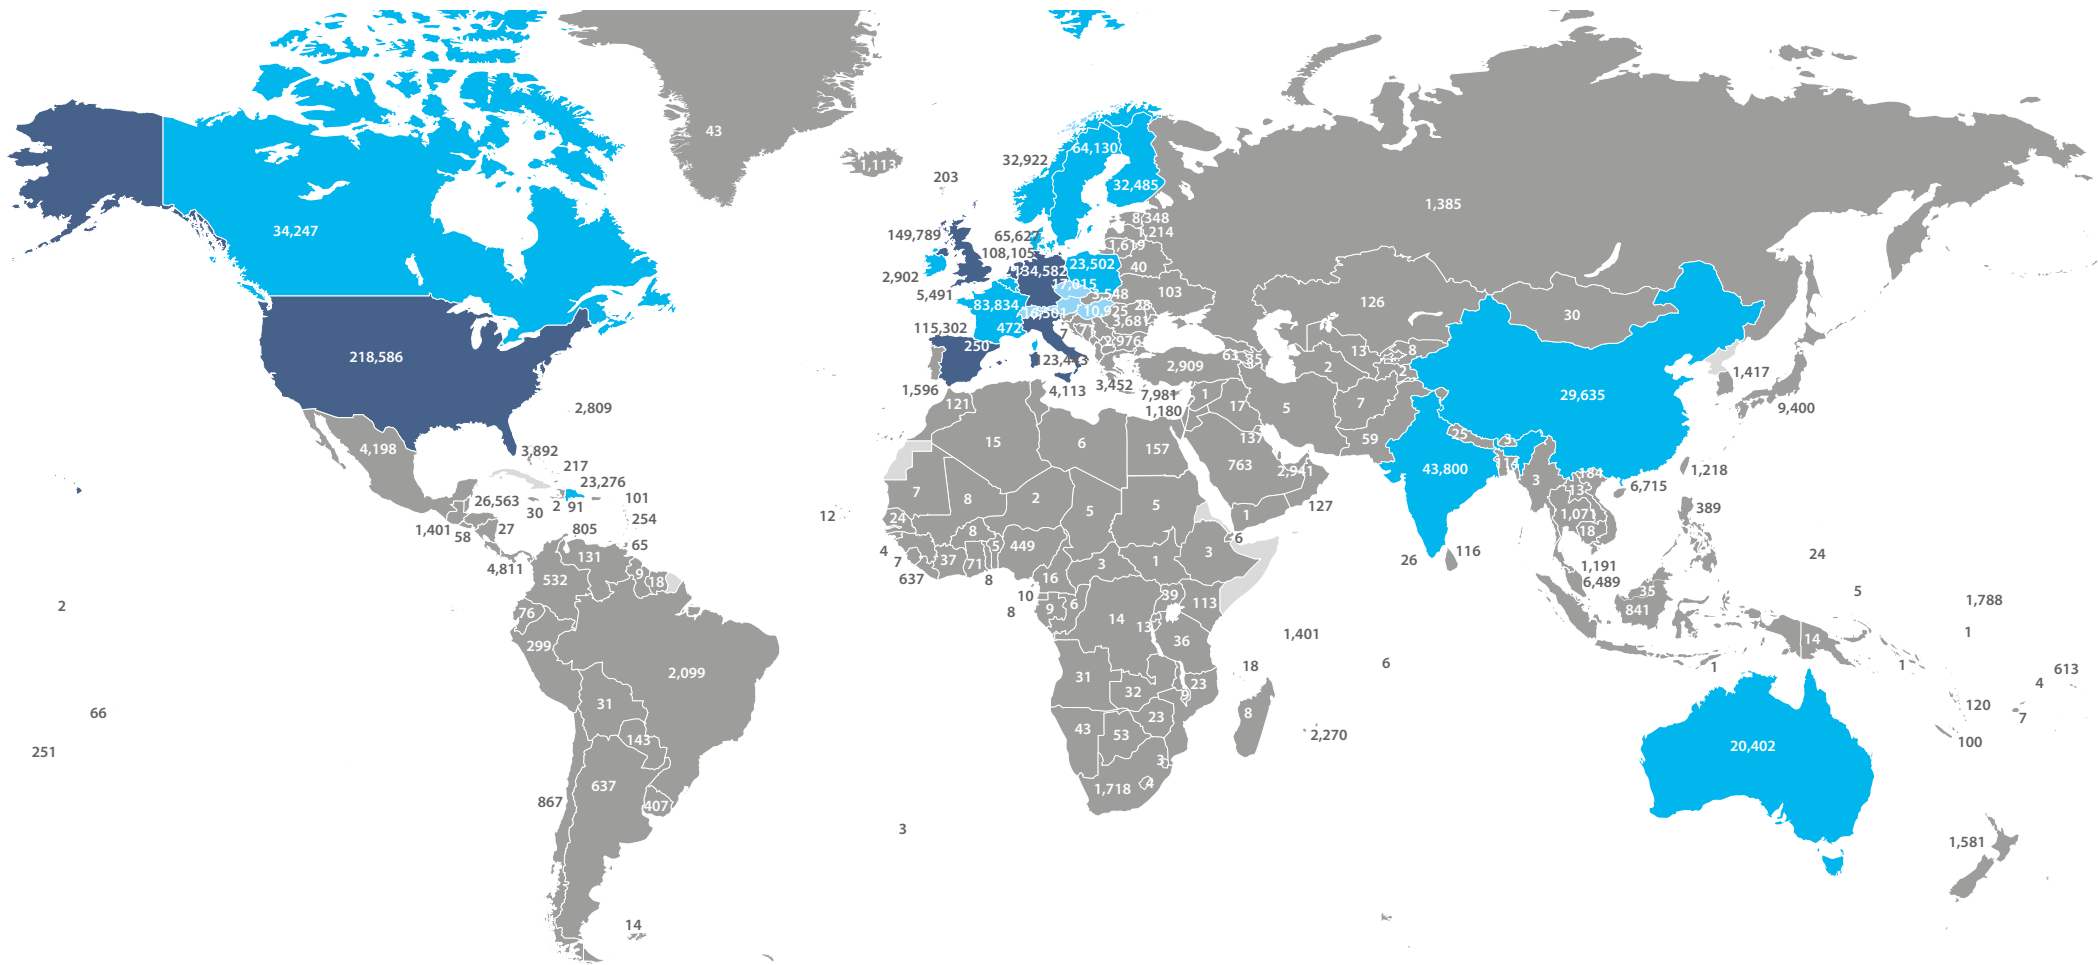

¹ This includes jurisdictions with at least 1,000 LEIs in total at the previous quarter-end date.

² Registration requirements vary based on jurisdiction. Please see the GLEIF Registration Authorities list for further detail: <https://www.gleif.org/en/about-lei/code-lists/gleif-registration-authorities-list>

Level 2 data report

Q3 2020

In May 2017, the process of enhancing the LEI data pool, by including 'Level 2' data to answer the question of 'who owns whom', began. The graphic below provides information on direct and ultimate parent data collected through September 2020¹.

1,506,447
legal entities reported
level 2 data by the end
of Q3 2020

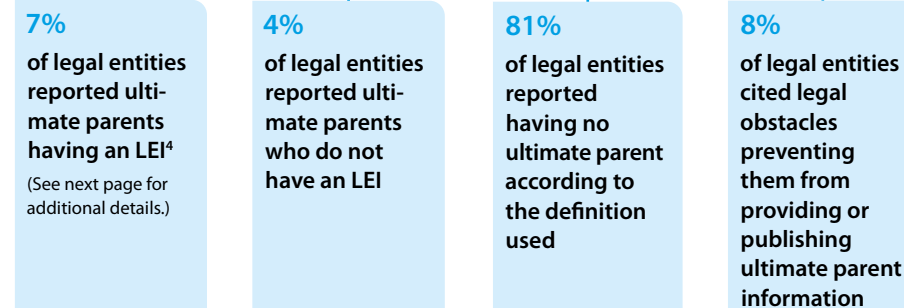

Top 5 jurisdictions of the legal entities for level 2 reporting | Fig.-1

Each legal entity reports information on its direct parent²:

Each legal entity reports information on its ultimate parent³:

¹ Referenced to level 2 relationship record CDF concatenated file dated 01 October 2020.

² 99.9% legal entities reported direct parent.

³ 99.9% legal entities reported ultimate parent.

⁴ The definitions of ultimate and direct parent are based on percentage share of accounting consolidation as per LEI Regulatory Oversight Committee prescription.

Level 2 data report
Q3 2020

Identification of the direct and ultimate parents of a legal entity with an LEI allows users to research entities owned by individual companies. It provides a better understanding of the entity from which a company or individual is buying goods or services or in which it is investing. The following charts provide additional information on relationships where the direct or ultimate parents are identified by an LEI.

Additional Information on Direct Parents Having an LEI

Additional Information on Ultimate Parents Having an LEI
