In February the LEI records showed significant improvement with regard to the quality criterion "Validity" by almost 3%. With a view to continuously improving the GLEIF data quality management program, the checks are further refined on an ongoing basis. For each report, the quality of the LEI data pool is assessed by applying the checks as set out in the latest version of the document 'Data Quality Rule Setting'. Also, two LEI Issuers were added to the Global LEI System this month.
