The data quality assessment performed on 30 June 2016 shows a further improved Total Data Quality Score. The score represents the percentage of all LEI data records that successfully passed checks performed to identify whether the records meet the defined quality criteria during the reporting period.

The Data Quality criteria is expected to contain 12 dimensions. Currently a subset of 7 criteria is implemented, to the detriment of the score, as they are averaged on all of them. This is expected to change, on a non-fixed timeline, to include all 12 dimensions.

### Data Quality Criteria

#### Jun May Apr 30-Jun-15
