LEI Data Quality Report
December 2016

The data quality assessment performed on 31 December 2016 shows that, the majority of LEI issuers now ensure required and expected data quality for the second consecutive month. During the past year, advances were seen in both the rigor of GLEIF’s data quality rule setting, as well as the ability of LEI issuers to conform to these new standards.

The Data Quality criteria is expected to contain 12 dimensions. Currently a subset of 7 criteria is implemented, to the detriment of the score, as they are averaged on all of them. This is expected to change, on a non-fixed timeline, to include all 12 dimensions.
