The Data Quality criteria is expected to contain 12 dimensions. Currently a subset of 7 criteria is implemented, to the detriment of the score, as they are averaged on all of them. This is expected to change, on a non-fixed timeline, to include all 12 dimensions.

The LEI Issuer Total Data Quality Score is calculated as the equal weighted average of the 7 'Data Quality Criteria'.

Progress achieved with regard to the continuous optimization of the data quality based on the LEI Issuer Total Data Quality Score.
