The LEI Issuer Total Data Quality Score is calculated as the equal weighted average of the 8 'Data Quality Criteria'.

The Data Quality criteria is expected to contain 12 dimensions. Currently a subset of 8 criteria is implemented, to the detriment of the score, as they are averaged on all of them. This is expected to change, on a nonfixed timeline, to include all 12 dimensions.

The Data Quality in Covered Countries is shown with a world map. The quality maturity level is shown with a bar chart indicating percentages for Jul: 0.99, Jun: 0.99, May: 0.99.

The top 5 failing checks are listed:
