The LEI Issuer Total Data Quality Score is calculated as the equal weighted average of the 11 'Data Quality Criteria'.

Progress achieved with regard to the continuous optimization of the data quality based on the LEI Issuer Total Data Quality Score.

The Data Quality criteria is expected to contain 12 dimensions. Currently a subset of 11 criteria is implemented, to the detriment of the score, as they are averaged on all of them. This is expected to change, on a nonfixed timeline, to include all 12 dimensions.

The Data Quality in Covered Countries

The LEI Issuer Data Quality (●) against LEI Pool Average (■)
