Highlights

The GLEIF Data Challenge Facility enables any LEI data user to contribute directly to the accuracy and completeness of the Global LEI System by challenging LEI records at any time. In August, around 80% of challenges resulted in updates to LEI data, showing how user challenges can lead to concrete data improvements. Users can rate the outcome and, if concerns remain, resubmit the challenge with additional context or evidence. Together, these actions help close the feedback loop and further strengthen the quality of LEI data. Read more in our latest “Metric in Motion” blog.
