Highlights

Aligned with the Global LEI System’s mission to provide reliable legal entity data, the Data Quality Criteria offer a measurable framework for assessing and enhancing data quality. The next three criteria - Accuracy, Comprehensiveness, and Representation - are essential to ensuring data correctness, complete entity coverage, and standardized representation. Together, they underpin 42 quality checks and play a major role in maintaining the Average Data Quality Score of 99.99. For more details on this month’s selected metric, read the [latest blog](#) of our new series, “Transforming Data into Opportunities – Metric of the Month.”
