Highlights

During the reporting period of July 2023, GLEIF has enhanced its data quality requirements and introduced 31 new and updated 19 data quality checks. This improvement includes support for Legal Entity Events and Fund Relationships introduced by ROC policies. Increasing the requirements for data quality led to a drop in the Average Total Data Quality Score to 99.81 and also in the number of LEI issuers achieving Required, Expected, and Excellent Data Quality. By the end of the current reporting period, the Total Data Quality Score has again reached 99.94, indicating a positive trend. The Average Days to close a challenge remained the same as the previous month.
