

METRIC IN MOTION

After the Challenge: Rate, Resubmit, Improve

Closing the Feedback Loop for Higher Quality LEI Data

High-quality Legal Entity Identifier (LEI) data is a shared effort. The GLEIF Data Challenge Facility enables any user to contribute directly to data accuracy.

The Features

Two Actions to Close the Loop

Rate the Resolution

Provides immediate feedback to LEI issuers on whether the process delivered a useful outcome.

Resubmit the Challenge

If concerns remain, resubmit with additional context or evidence without starting from scratch.

Metric of the Month

Around

80%

Of challenges* resolved in August resulted in direct updates to LEI data.

* This figure is calculated based on challenges resolved during the month and represents the share that led to a data update. Users can provide feedback on any resolution and re-submit a challenge if the outcome does not fully address their concerns. Kindly note that the above represents individual challenges and does not include bulk or data feed challenges.

The Impact

With Just a Few Additional Clicks, Better Data

Step 1

Challenge Data

Step 2

Rate & Resubmit

Step 3

Continuous Quality

Transforming Data into Opportunities

With GLEIF's trusted standards, the future of digital trust starts here.
